DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Figure 5C and Page 24, Line 8 through Page 25, Line 5 of Applicant's Specification (see claims 10-15, 53-56, 86-90 and 92-93), Figure 5D and Page 25, Lines 6-20 of Applicant's Specification (see claims 32-37 and 91) and Figure 5E and Page 25, Line 21 through Page 26, Line 16 of Applicant's Specification (see claims 77-79). The species are independent or distinct because the claims are directed towards three distinct processing methods for determining a future program transmission schedule classified in 725/28 for providing access control of programs based on ratings, 725/93 for a control process in a user-requested (content being consumed) video on demand environment and 725/14 for passively monitoring all operations of a receiver (unconsumed content), respectively.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
